# Anatomy Questions- 2010 From the midterm exam

ملاحظة : هذه الاسئلة للدكتور اللي كان يدرس السنة الماضية وقد يختلف اسلوب دكتورنا عنه...

Anatomy Questions-2010  
From the midterm exam

Note: Try to answer these questions after you study the subject

1. Which muscle /muscles abduct the shoulder up to 90° ?

- a. Infraspinatus
- B. Deltoid and supraspinatus\*
- c. Deltoid
- d. Trapezius
- E. Deltoid and infraspinatus

2. All the following are from the posterior wall of Axilla Except:

- a. Scapula
- b. subscapularis
- c. Teres major
- D. Latissimus dorsi
- e. Teres minor \*

3. Which of the following means above stomach:

- a. hypogastric
- b. antigastric
- c. epigastric \*
- d. gastritis
- e. gastectomy

4. Which of the following is wrong about ulnar nerve:

- a. Originates from medial cord
- b. doesn't supply the anterior compartment of the upper arm
- c. passes anteriorly to the medial epicondyle of humerus \*
- d. supplies one and half muscles of the forearm
- e. passes lateral to pisiform

5. The plane that divides the body into anterior and posterior parts is :

- a. midsagittal
- b. sagittal
- c. horizontal
- d. coronal \*

6. Which one is wrong about bones' shape :

- a. Scapula-flat bone
- b. Femur – long bone
- c. Vertebra – sesamoid bone \*
- d. Wrist – Short bone

7.If you want to say near the trunk you say :

- a. anterior
- b. proximal \*
- c. posterior
- d.superior

8. Which of the following wrong about median nerve :

- a. Supplies all the anterior compartment of forearm except one & half muscles
- b. It is above Palmaris longus \*
- c. It supplies thenar muscles and half the lumbrical muscles

9. A common site of Implantation :

- a. anterior wall of uterine cavity
- b. Fundus of uterus
- c. Posterior wall of uterine cavity \*
- d. Ovary
- e. Uterine tube

10. A common site of fertilization :

- a. Cervical canal
- b. Ampulla \*
- c. Isthmus
- d. uterine cavity

11. Which of the following secretes fructose fluid :

- a. prostate
- b. vas deference
- c.epididymes
- d. Seminal vesicle \*
- e. Testis

12. Which of the following is wrong about oogenesis :

- a. oogonia is formed by the end of the 5<sup>th</sup> week
- b. oogonia reach the maximum number by the 7<sup>th</sup> M
- c. Near birth 1ry oocytes enter diplotene stage and remain until menopause \*

**13.** The step in Meiosis that gives the genetically different cells :

- a. Duplication of chromosomes
- b. In Metaphase  $\square$  chromosomes aligned at equator
- c. Reshuffling and crossing over the chromosomes \*

**14.** Which of the following is wrong:

- a. Utrine tube about 4 inch long
- b. External Os is transverse nullipara woman \*
- c. The normal position of the uterus is enteverted

**15.** Which of the following is wrong about prostate:

- a. It is below urinary bladder
- b. pyramidal in shape
- c. It secretes acidic fluid to neutralize vaginal secretion \*
- d. Formed of lobes

**16.** All these muscles are inserted into tibia except:

- a. Sartorius
- b. Rectus femoris
- c. Rectus lateralis
- d. Pectineus \*
- e. Vastus medialis

**17.** Which of the following is wrong about femoral triangle:

- a. It's lateral border is Sartorius
- b. Roof: skin, superficial fascia, great saphenous opening, deep fascia
- c. Floor: psoas, iliacus, pectineus, adductor brevis \*
- d. Contents: Femoral artery, nerve, vein, lymph nodes

**18.** Which is wrong about spinal cord:

- a. It is divided into 31 segments
- b. White matter is full of axons
- c. Ventral root is motor
- d. Spinal nerve is formed of motor fibers \*

**19.** Which of the following is wrong about adductors:

- a. All adduct the hip
- b. Supplied by obturator artery and profunda femoris
- c. All cross one joint except 2 muscles \*

**20.** Which of the following is wrong about the spinal cord:

- a. Located inside the vertebral column
- b. Extending from the base of the skull
- c. It ends at L3/L4 vertebral desk \*
- d. It has 2 enlargements

**21.** Which statement is wrong about hand:

- a. Lumbrical muscles for writing position
- b. Superficial palmar arch is mainly contributed by ulnar artery
- c. Deep palmar arch is mainly contributed by ulnar artery \*
- d. Median nerve and ulnar nerve supply it

**22.** Which of the following is supplied by 2 nerves:

- a. Adductor longus
- b. Adductor magnus \*
- c. Pectineus
- d. Adductor brevis

**23.** Which statement is wrong about femoral nerve:

- a. passes beneath the middle third of Inguinal ligament
- b. Originates from anterior division of L2,L3,L4 \*
- c. enters femoral triangle where it divides

**24.** Which of the following is mismatched :

- a. Medial cubital vein – rarely used to obtain blood \*
- b. Brachial artery – starts at lower border of teres major
- c. Sciatic nerve – is the largest nerve in human
